NEW COVENANT BIBLE CHURCH

Cedar Rapids, IA

A large audience is seated in a lecture hall, facing a stage. The room is dimly lit with a strong blue hue. Two large projection screens are visible on the stage, displaying content. The audience members are mostly seen from behind, and many are looking towards the stage. The ceiling features exposed ductwork and lighting fixtures. The overall atmosphere is one of a formal educational or professional event.

DAVID STRICKLAND

, AIA, LEED AP BD+C
PRINCIPAL

As a design principal, David directs the Religious Studio projects. He is known for his strategic ability to listen to his clients and to satisfy their needs, desires, goals and dreams for the future of their facilities. This is done with a collaborative team effort.

He is a forward thinker, who has an intuitive understanding of the master planning process. His work has led to him receiving numerous awards and recognitions. The structures he designs are known for their progressive nature and functionality.

He has a deep understanding of the design process along with the structural requirements that go into each project. He takes time to study and to think about how the structures he helps to create will impact the lives of those who use them. He is a LEED accredited professional, who is extremely skilled in maximizing a client's resources through the implementation of sustainable design principles.

JONATHAN FALLIN

, AIA
PROJECT ARCHITECT

Jonathan is an architect, whose current focus centers on religious projects. He is experienced in planning, detailing, designing and coordinating projects in both public and private sectors. He also has managed projects that vary in size and type, which has led to his extensive knowledge of engineering coordination and architectural codes.

Being born into a family of ministers gave him a natural passion for working with churches to design facilities that encourage ministry opportunity, and good stewardship. He is recognized as a designer who approaches a project from the client's perspective. His creative design solutions help our clients reach their goals while achieving a sustainable and highly functional facility. Several of Jonathan's projects have received LEED awards, one of which was the first Forest Service building in the nation to be awarded the Gold Standard.
